

# Let Thalassaemia Australia bring your Science text book to life and provide your students with a FREE presentation on:

- the genetic condition, Thalassaemia, to coincide with the **current science/biology/health syllabus**, including information on current medical research, and pre-natal testing.
- A personal insight into living with a genetic condition, where possible.
- The importance of carrier testing for one of the largest genetic blood disorders in the world - see [www.thalassaemia.org.au](http://www.thalassaemia.org.au) for more information, as this may be relevant to your students.
- Encourage participation in community service amongst your students, by encouraging them to become blood donors.

Thalassaemia Australia has been conducting these educational presentations to Secondary and Tertiary Institutions for over 20 years with the support of the Department of Health Victoria.

## To book your FREE presentation:

- Please email [info@thalassaemia.org.au](mailto:info@thalassaemia.org.au) with the following information:
  1. Preferred Date/Time of Presentation
  2. Year Level and Number of Students
  3. Your Contact Details/School Name and AddressOr
  4. Telephone: 9888 2211

*Please note: It would be appreciated if you could allow for travel time from Mt Waverley when planning your preferred time for our presentation.*

**Although our presentations are free, we gratefully accept donations to assist us with the costs associated with providing this education program.**
